CPA 50E FLOW CONDITIONER

FEATURES AND BENEFITS

- *Applicable to Orifice, Ultrasonic, Vortex and Turbine Metering*
- *Essential for Superior Measurement Accuracy and Repeatability*
- *Isolates Meter from upstream Flow Disturbances*
- *Stable Flow Profile*
- *Competitively Priced*
- *Ease of Installation / Maintenance (Simple, one piece design)*
- *Short Meter Run*
- *Functionally eliminates Swirl, provides a Fully Developed Velocity Profile*
- *Suited to Any upstream piping configuration*
- *Extensively Tested at Recognized Facilities*
- *Most Sizes available from Inventory*
- *Meets all testing requirements of AGA-3, ask for details*
- *Extensively used*
- *Extensive Approvals*
- *Can be used as a Repeatable Secondary Measurement Device (Check Meter)*
- *Low Pressure Drop*
- *Very Simple Retrofit for Flanged Style Tube Bundles*
- *Minimal Noise*
